Dept. of Natural Resources & Energy

Atten: Act 019/016

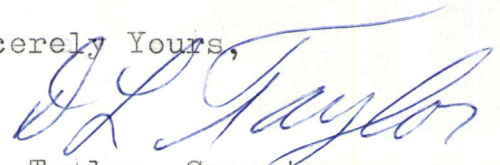

In response to your order dated November 30, 1982, Winecup Resources Inc. has asked Taylor Livestock Corp. by letter dated January 20, 1983 for our plans for the property. As we stated in the hearing on Nov. 30, 1982, we hope to move another operator onto the property this Spring in order to remove the gold prior to a new highway being built.

I talked today with Sam Taylor, one of the commissioners on the Dept. of Transportation. He stated that the new Dewey Bridge was in the top 20 projects and would likely be funded this year due to the new Gas Tax funds.

We would like to request a delay in the reclamation work until we can see if the bridge and highway get funded this year. If the bridge gets funded, we hope to sell the gravel for construction.

We would be willing to post a bond for reclamation if the bridge gets funded or if we can get an operator on the property we would require that they post the necessary bond. If neither of the above happens in the near future, we would allow Winecup to do the required reclamation this summer.

Sincerely Yours,

D.L. Taylor, Secretary  
Taylor Livestock Corporation
